

# TECHNICAL DATA SHEET

## Formula for maintenance of the door sheath

for cleaning, maintenance and long-term protection of garage doors

<b>Packaging:</b>	400ml aerosol container
<b>Colour:</b>	Transparent
<b>Intended use:</b>	Plastic and rubber parts of garage doors
<b>Applications:</b>	The formula is intended for cleaning, maintenance and long-term protection of garage doors. Intended for garage door shells. Perfect for parts made of plastic and rubber. With an antistatic effect, it helps protect surfaces against dust, dirt and moisture. Restores the original finish and natural colour of the cleaned elements.
<b>Surface preparation:</b>	Before using the formula, remove dust and sand with a cloth.
<b>How to use:</b>	<ol style="list-style-type: none"><li>1. Before use, mix well by shaking the container for about 1-2 minutes.</li><li>2. Perform a test spray.</li><li>3. From a distance of 15-20 cm, apply the preparation evenly on the clean surface.</li><li>4. Wipe with a micro-fiber cloth or a cleaning rag until the formula evaporates.</li></ol>
<b>HSE:</b>	For professional use. Before use, read the technical information sheet and information on the packaging. The user must comply with the HSE regulations applicable in a given country.
<b>Storage:</b>	Store the product in a closed container in a dry and ventilated room. Keep away from children and unauthorized persons.

**NOTE:** Pressurized container: protect from sunlight and avoid exposing to temperatures above 50°C and below -4°C.
